

Heatmap showing the performance of 10 fusion methods across 10 datasets. The methods are listed on the y-axis: MacSplice, EnCoSplice, JAFFA-Hybrid, SGM-Asa, JAFFA-Assembly, PRADA, iFuse, iFuse, iFuse, ChroPlex, FusionCatcher, TopHat-Fusion, JAFFA-Direct, ChroSDE, and STIM-Fusion. The datasets are numbered 1 to 10 on the x-axis. The color scale ranges from dark blue (low performance) to light blue (high performance).
